KANSAS HIGHWAY PATROL FLEET SALES

High Quality, Low Mileage Vehicles

"I Can't justify buying the newer model just because it is newer, when they (Fleet Program vehicles) are all in the same excellent condition."

Ellsworth County Sheriff Tracy Ploutz

Since 1994, the Patrol has provided hundreds of agencies with high quality, low-mileage vehicles at a reduced cost. These vehicles are strictly maintained, providing safety, quality, and financial benefits to its drivers, occupants, and the community as a whole.

AFFORDABILITY

- Vehicles are typically sold at two-thirds of the new cost.
- Agencies are able to affordably purchase more vehicles at one time.
- Light bars and push bumpers are available at extra cost.
- A variety of colors available.

SAFETY

- Cars have 49,500 miles and trucks have 69,500 miles.
- Maintenance schedules follow the manufacturer's recommendations.
- Maintenance logs are kept with the vehicle and detail dates, mileage, service upgrades, warranty, and repair work, giving purchasers full knowledge of the vehicle's history.

QUALITY

- These dependable vehicles are fully serviced and professionally detailed.
- Many agencies use patrol vehicles to implement "take home cars" for their officers.
- Once a vehicle is retired from your agency, vehicles can then be used by schools, city car-pools, and county commissioners.
